OBJECT SUMMARY

Computer Science graduate specializing in .NET backend development, with hands-on experience building RESTful APIs using C#, ASP.NET Core, Entity Framework Core, and SQL Server. Experienced in writing clean, maintainable code and applying SOLID principles, Design Patterns, Clean Architecture, N-Tier Architecture, Dependency Injection, and MediatR. Familiar with ASP.NET MVC and SignalR, with strong problem-solving, debugging, and troubleshooting skills.

EDUCATION

Bachelor of Computer Science and Information Technology **2022 – 2026**

The Egyptian E-Learning University (EELU)

EXPERIENCE

.NET Backend Developer Trainee **2024**

ERAA Soft .NET Camp

- Developed RESTful APIs using C#, ASP.NET Core, Entity Framework Core, and SQL Server.
- Applied Layered Architecture, N-Tier Architecture, Repository Pattern, Unit of Work, Dependency Injection, and SOLID principles.
- Used LINQ and Entity Framework Core to query and manage relational database data.
- Used Git/GitHub, feature branches, and Pull Requests in collaborative team development.
- Debugged and troubleshot application issues to identify and resolve backend problems.

AI Engineer Trainee **July 2024 – October 2024**

Etisalat

- Worked with Machine Learning, data preprocessing, and model development workflows.
- Gained practical experience building AI and data-driven solutions.

PROJECTS

Smart Egypt Tourism Platform

C# | .NET 8 | ASP.NET Core Web API | EF Core | SQL Server | MediatR | CORS | Clean Architecture | JWT | FluentValidation | Hangfire | Serilog

- Developed a tourism platform API using ASP.NET Core Web API and .NET 8 with Clean Architecture and MediatR.
- Implemented authentication, booking, marketplace, filtering, searching, sorting, and pagination using EF Core and SQL Server.
- Integrated JWT authentication, FluentValidation, Swagger/OpenAPI, Hangfire, Serilog, and Repository Pattern.

Job Management System **GitHub Repo**

C# | ASP.NET Core | EF Core | SQL Server | Git/GitHub

- Developed backend functionality for job management and business workflows using N-Tier and Layered Architecture.
- Applied Repository Pattern, Generic Repository, Unit of Work, and Dependency Injection.
- Used LINQ and Entity Framework Core for database operations and business logic.
- Used Git branches and Pull Requests for systematic feature development and code integration.

Napaty — Agricultural & Plant Disease Diagnosis Platform (Graduation Project — Grade: A+) **GitHub Repo**

Django | Python | REST APIs | AI Integration

- Developed backend APIs and database functionality for plant disease diagnosis, crop and fertilizer recommendations, and marketplace features.
- Contributed to AI chatbot integration and collaborated with a cross-functional development team.

Hospital Management System API **GitHub Repo**

ASP.NET Core | C# | EF Core | SQL Server | JWT

- Developed APIs for patients, doctors, appointments, and medical records with JWT authentication and role-based authorization.
- Implemented pagination, filtering, validation, and global exception handling middleware.
- Applied debugging and troubleshooting techniques to identify and resolve application issues.

E-Commerce API & Student Management API **GitHub Repo**

ASP.NET Core | C# | EF Core | SQL Server | LINQ

- Built RESTful APIs for products, categories, shopping carts, orders, and student management using CRUD operations and LINQ.
- Implemented input validation, search, filtering, pagination, and Swagger/OpenAPI documentation.

SQL Server Employee Management System **GitHub Repo**

SQL Server | T-SQL

- Built a complete database solution utilizing CRUD operations, stored procedures, triggers, constraints, relationships, and transactions.
- Applied relational database concepts and database design principles.

CERTIFICATIONS & ACHIEVEMENTS

- **Full Stack .NET Training** — Digital Egypt Pioneers Initiative (DEPI), 2024
- **Amazon Public Cloud Practitioner** — NTI, 72 Hours, 2024 | Score: 92%
- **ITS: Device Configuration & Management** | Score: 991/1000
- **C# Programming** — Information Technology Institute (ITI), 42 Hours, 2024
- **Cisco CCNA** — National Telecommunication Institute (NTI), 20 Hours, 2023
- **AI Fundamentals** — Microsoft Azure, 2023
- **Cloud Foundations** — AWS Academy, 2024
- **Internet of Things (IoT) App Development** — ITI, 30 Hours, 2023
- **AI Career Essentials (AIC)** — ALX, 2024
- **HTML5, CSS, JavaScript & Copilot** — Microsoft & Sprints, 2024
- **ICPC ECPC Qualifications Contest**, 2025

TECHNICAL SKILLS

Backend Development: C#, .NET 8, ASP.NET Core, ASP.NET Core Web API, ASP.NET MVC, RESTful APIs, OOP, LINQ, Entity Framework Core, Async Programming, SignalR

API & Security: JWT Authentication, Authorization, Swagger/OpenAPI, Postman, Middleware, FluentValidation, Exception Handling, CORS

Architecture & Design: N-Tier Architecture, Clean Architecture, Layered Architecture, SOLID Principles, Design Patterns, CQRS, MediatR, Repository Pattern, Generic Repository, Unit of Work, Dependency Injection

Database: SQL Server, Relational Databases, Database Design, Relationships, Constraints, Stored Procedures, Triggers, Transactions

Development Practices: Clean Code, Debugging, Troubleshooting, Problem Solving

Tools & DevOps: Git, GitHub, Feature Branches, Pull Requests, Visual Studio, SSMS, Serilog, Hangfire, Postman

Additional: HTML5, CSS3, JavaScript, Python, Django, C++, Machine Learning Fundamentals, CCNA, Cloud Fundamentals
